
(a) Problem
detector's mark
lesion
(b) Paired crops, shared exterior
control
control + lesion
same exterior outside the hatched 14-mm ball ⇒ one forecast f
(c) Same f, aligned vs rotated
subtract aligned f
subtract rotated f (sham)
mark on lesion
mark stays on vessel
(d) Outcome
broader held-out set, 10% FPR, 95% CI
crop
+2.1
localized
+6.1
